ABOUT US

We are a family owned company who pride ourselves on providing a good quality service. We offer a fair price for a fair day's training; the price you see is what you pay; there are no extra charges for course materials or for certification on completion of non-accredited courses. All our FLT course rates are PER DAY and not PER PERSON

We are based in the North West and have national contracts with customers that take us all over the UK. We hold accreditations from ITSSAR for our FLT/Plant equipment courses and IOSH for our Managing/Working safely courses. We can conduct your training locally or at any of your locations - distance is no barrier.

At our training facility in Wigan we run Counterbalance and Reach Truck courses; We also have a training facility to conduct our Health and Safety courses. We are geared up to supply all your FLT/Plant and Health and Safety requirements; all materials handling equipment training LT Dickinson cover all your training needs at a competitive price.

Forklift Truck Courses

All courses are based on a maximum of 3 operators. All courses will require the operators to complete three tests to gain certification (Pre use, Theory and Practical Test)

Counterbalance (B1, B2, B3)

IOSH Managing Safely

Are your Managers and Supervisors aware of their legal responsibilities in the workplace? Can they recognise bad practices? Do they know the consequences of not managing safely, i.e. possible fines or imprisonment?

With our 3-day IOSH Managing Safely course we will teach them to recognise potential hazards in the workplace to comply with legislation. We will teach them how to complete Risk Assessments and recognise when the company's Safe System's Of Work are not being followed. On successful completion of the course your managers and supervisors will receive IOSH certification.

IOSH Working Safely

Are your employees aware of their Health and Safety responsibilities in the workplace? Do they know what will happen if they do not follow the company's Safe System Of Work or Method Statements? This 1-day course will teach your employees what is expected of them to comply with legislation. It will teach them the consequences of not following their responsibilities under Health and Safety Law. On successful completion each student will receive a certificate or i.d. card from IOSH.

First Aid

Would you know what to do in case of an emergency or if someone is injured in your place of work? Do you have adequate arrangements if this was to happen? Our First Aid courses will help you comply with your legal responsibilities and also put your mind at rest knowing if the worst happens, you have things in place. Our First Aid courses are:-

AED (Defib) – Half Day; Emergency First Aid At Work – 1 Day
First Aid At Work Refresher – 2 Days; First Aid At Work – 3 Days

Why Train With Us?

We have 25 Years experience of operating a wide range of trucks in different environments and know full well the pressures which the job entails.

On-Site specialists: we have conducted training on-site for many years and, in that time, we have learned to adapt to all the situations we have found ourselves in; we always try to be flexible in our approach to the needs of the particular business.

One Stop Training: We not only cater for all your forklift truck training but we also provide Health and Safety Training, in addition to Manual Handling and Risk Assessment training.

Great after sales service: We will always be available to answer all queries before and after training.

Reduced costs: A correctly trained operator can increase the profitability of your company through safe operation and lower maintenance costs; an untrained operator can increase your costs due to lack of experience and knowledge of the truck limitations.

To comply with the law: Employers have a legal duty to provide adequate training for people in their employment. Also, when basic training is completed, to provide Specific Job Training and Familiarisation before written authorisation is issued.
